

KS-1000

Empire **KS 1000** is a completely new **2.1** sistem that features a MDF wooden Subwoofer and satellites with a modern design.

The subwoofer driver is placed into the subwoofer cabinet upside-down for a better reproduction of low frequencies. Contrariwise the Bass Reflex port is placed on the front.

Satellites are designed to look innovative and guarantee an optimal frequency response of medium and high tones. A special acoustic insulation optimizes the sound direction and if the satellites are placed properly on your desk you will feel it like never before on systems of this price range.

Satellites drivers are **2.25"** made of a special reinforced fiber, so to be perfect to reproduce a wide range of frequencies from mid-basses to high.

The subwoofer features Volume and Bass controller right next to the Bass Reflex port. Empire KS-1000 is great for PCs, Notebooks, MP3s and Gaming Consolles.
